REGIONAL CENTRE FOR BIOTECHNOLOGY

Applications invited for Summer Research Internship at RCB

Regional Centre for Biotechnology (RCB) is an institution of national importance, created by an Act of Parliament, established by Government of India through the Department of Biotechnology (DBT) under the auspices of UNESCO. RCB has emerged as a pioneering institute for research in Biotechnology and is defining new horizons in providing world-class education, training and research at the interface of multiple disciplines for the benefit of mankind.

RCB has a strong commitment to exploring new frontiers, furthering science and connecting revolutionary areas of Biotechnology through cutting-edge research. The Centre boasts of the state-of-the-art research laboratories at par with the global standards. It also has an Advanced Technology Platform Centre (ATPC), a highly sophisticated instrumentation facility and a Bio-incubator established in association with BIRAC that links promising research outcomes to commercialization.

The scientists at the Centre work at the interface of multiple disciplines in the areas related (but not limited) to structural biology, systems and synthetic biology, infectious disease biology, agricultural biotechnology, molecular medicine, cancer and cell biology. The details of scientists and research work carried out at RCB is available on our website www.rcb.res.in.

Applications are invited from postgraduate students and undergraduate students in their final year for Summer Research Internship at RCB from 15 May to 01 July 2020.

Interested students may mail their application mentioning area of interest and attaching their resume along with a write up on what motivates them for a career in research and the tentative research idea (online form) at Summer Research Internship: The last date of sending application is 30 March 2020.

Kindly note that hostel facility is not available. You will have to make your own arrangement for stay.
